Product Description

Product Description

Tungsten Carbide Insert

Cemented carbide blade is made of cemented carbide, cemented carbide is a kind of alloy material made by the hard compound of refractory metal and bonding metal through the powder metallurgy process.

Hard alloy has a series of excellent properties such as high hardness, wear resistance, good strength and toughness, heat resistance, corrosion resistance, especially its high hardness and wear resistance, even at the temperature of 500°C is basically unchanged, at 1000°C still has a very high hardness.
