Instructions for use

1. Before using the tool, please measure the tool runout. If the tool accuracy exceeds 0.01MM, please correct it before cutting.

2. The shorter the tool extends from the chuck, the better. If the tool extends longer, the speed, feed speed or cutting amount should be reduced.

3. During cutting, if abnormal vibration or sound occurs, please reduce the speed and cutting amount until the situation improves.

4. Spray and jet cooling are preferred for steel cooling, which can improve the use effect of the milling cutter.
