## Product Description

Aluminum Taps Special Spiral Taps For Aluminum Alloys Fine Thread Taps For High Cobalt Aluminum

### Product Description

#### Spiral Fluted Taps

The difference between the spiral wire tap and the general hand tapping is that the ordinary hand taps the groove into a straight line, and the spiral tap is a spiral type. When the spiral wire tapping is tapping, with the spiral rotation of the spiral groove, the iron scrap can be easily discharged outside the hole, so as to prevent the iron filings from remaining or clogging in the groove, causing the wire to break and break the blade portion, so that it can grow. The life of the wire tapping and the cutting of the highest precision thread. Spiral tapping is suitable for cutting high toughness materials, and is not suitable for scraping materials such as cast iron.

## Company Introduction

Dongguan Kunming Electronic Technology Co., Ltd. focusing on the production and sale of CNC tools. The company manages a wide range of cutting tools, which are mainly used in mold processing, automotive parts processing, IT industry, graphite processing, shipping and machinery industries. Since the establishment of the company, We have been maximizing the interests of customers as its own responsibility, and customers to maintain close cooperation and smooth communication, and on this basis, constantly optimize innovative product categories, and continue to provide partners with stable, high-quality and competitive cutting tools.

## Product Contents

Standard mold tools, stainless steel tools, aluminum tools, graphite tools, micro-diameter tools, T-type Tool, tungsten steel drill, rough milling cutter, tungsten steel reamer, chamfering cutter, inner R cutter, fixed point drill, taper cutter Customized with all kinds of non-standard tools.

## FAQ

1. Can the price be reduced for large quantities?

Yes, bigger quantity orders are cheaper.

2. What is the lead time for mass production?
